

GET THE MOST OUT OF YOUR IFS APPLICATIONS

Congratulations, you've made the all-important decision to employ IFS's leading field service solutions in your business. Now, the next question is, "Which mobile device will ensure I get the most out of the IFS application?" Zebra rugged devices are more than just tough; their flexible design lets you to tailor them to meet your specific needs and perform at your best in virtually any situation, under any circumstance. **Here's why.**

ZEBRA RUGGED TABLETS AND HANDHELD DEVICES PERFORM IN ANY SITUATION, UNDER VIRTUALLY ANY CIRCUMSTANCE

Protection from the most extreme elements.

Built to handle sweltering heat, frigid cold and inclement weather to ensure frontline workers can work efficiently in any environment.

Increased visibility in bright environments.

Higher nit ratings make it easy to view information displayed on-screen when working outdoors in bright sunlight.

Peak performance that lasts the entire shift.

Extended-life batteries allow your team to use Zebra rugged tablets for up to 27 hours without needing to recharge, or hot-swap batteries for continuous use.

Rugged design.

The waterproof, dustproof and drop-proof tablets are built to handle it all – even drops from up to 6 feet – while operating. Zebra tablets also comply with MIL-STD-810G and IP65 for added durability and reliability.

Connect from virtually anywhere, any time.

Access critical data from remote locations and areas with low reception by utilizing Zebra tablets' industry-leading wireless and GNSS capabilities.

Add functionality with versatile accessories.

Extend capabilities and lower your total cost of ownership with accessories that include docking solutions, batteries, chargers, keyboards and more.
